Science & Education **4**: 411–413, 1995.

CONTENTS OF VOLUME 4

Volume 4 No. 1 1995

WALLIS A. SUCHTING / The Nature of Scientific Thought 1

MIKE U. SMITH, HARVEY SIEGEL and JOSEPH D. McINERNEY / Foundational Issues in Evolution Education 23

KEVIN C. DE BERG / Revisiting the Pressure-Volume Law in History: What can it Teach us About the Emergence of Mathematical Relationships in Science? 47

RUTH S. DE CASTRO and ANNA-MARIA PESSOA DE CARVALHO / The Historic Approach in Teaching: Analysis of an Experience 65

JACK A. ROWELL and JUDITH M. POLLARD / Raising Awareness of Uncertainty: A Useful Addendum to Courses in the History and Philosophy of Science for Science Teachers? 87

Book Notes 99

News 105

Contributors 107

Volume 4 No. 2 1995

HERMENEUTICS AND SCIENCE EDUCATION: A DISCUSSION

ROBERT P. CREASE / The Sculpture and the Electron: Hermeneutics of the Experimental Object 109–114

FABIO BEVILACQUA and ENRICO GIANNETTO / Hermeneutics and Science Education: The Role of History of Science 115–126

PATRICK A. HEELAN / Quantum Mechanics, Social Science and Hermeneutics 127–136

JAMES T. CUSHING / Quantum Mechanics, Underdetermination and Hermeneutics 137–146

DIMITRI GINEV / Between Epistemology and Hermeneutics 147–159

WALLIS A. SUCHTING / Much Ado About Nothing: Hermeneutics and Science 161–171

MARTIN EGER / Alternative Interpretations, History, and Experiment: Reply to Some Commentaries 173–188

Book Notes 189–193

News 195–196

Letter: *A Little Ado About Something*, James T. Cushing 197

Contributors 199–201

Volume 4 No. 3 1995

NANCY J. NERSESSIAN / Should Physicists Preach What They Practice? Constructive Modeling in Doing and Learning Physics 203–226

JOHN M. HEFFRON / The Knowledge Most Worth Having: Otis W. Caldwell and the Rise of the General Science Course 227–252

OLWEN MCNAMARA / Saussurian Linguistics Revisited: Can it Inform Our Interpretation of Mathematical Activity? 253–266

EDUARDO FLEURY MORTIMER / Conceptual Change or Conceptual Profile Change? 267–285

WILLIAM W. COBERN / Science Education as an Exercise in Foreign Affairs 287–302

Book Notes 303–308

Letter: *Wolf on Impetus* (ENRICO GIANNETTO) 309

Contributors 311–312

Volume 4 No. 4 1995

Editorial 315–316

GERARD D. THIJS and ED VAN DEN BERG / Cultural Factors in the Origin and Remediation of Alternative Conceptions in Physics 317–348

NEUS SANMARTI, MERCE IZQUIERDO and ROD WATSON / The Substantialisation of Properties in Pupils' Thinking and in the History of Science 349–369

NORMAN LEDERMAN / Suchting on the Nature of Scientific Thought: Are We Anchoring Curricula in Quicksand? 371–377

STELLAN OHLSSON / Epistemic Obstacles and the Marriage of Fantasy to Rigor: A Response to Suchting 379–389

JOHN DEWEY / Science as Subject-Matter and as Method (orig. 1905) 391–398

Book Reviews:

Lindley Darden, *Theory Change in Science: Strategies from Mendelian Genetics* (DOUGLAS ALLCHIN)

William Bechtel and Robert C. Richardson, *Discovering Complexity: Decomposition and Localization as Strategies in Scientific Research* (DOUGLAS ALLCHIN) 399–402

Book Notes 403–405

News 407–408

Contributors 409–410
